ABOUT US

Carbon Minus India (CMI); along with **Indian Institute of Sustainable Development (IISD)** brings this Certificate Course as an initiative of their **Carbon Management School (CMS)** and **School of Business Sustainability (SBS)**.

Carbon Minus India (CMI), an IISD initiative, is also a Leading Indian Public Policy Think Tank and Research Institute in New Delhi, committed to protecting Our Only Planet, Mother Earth, from Global Warming and other adverse impacts of Climate Change. CMI is engaged in evolving a strategic framework for India in identifying low carbon growth opportunities and facilitates a series of planned and scaled-up programs, striving to lower the carbon intensity of the economy at the macro and sectoral levels by creating synergies and addressing the barriers, potential trade-offs and appropriate financial (Carbon Finance Models) needs to remove these blockades. Moreover, CMI works to raise India's consensus efforts and for national preparedness to face and address global climate change adaptation and mitigation challenges.

Indian Institute of Sustainable Development (IISD) is registered as a National, Independent Public Policy Think Tank and Scientific Research Institute in New Delhi to ensure overall improvement of the lives and living of the Common Man through Research Innovations and engage with Communities at grass-root level. IISD strives to put India into a Sustainable Path that is Inclusive and Equitable, involving People, planet and Businesses.

Why this Certificate Course ?

The entire humanity is going through a transition with a 1.2°C higher temperature compared to the pre-industrial level; higher than the Planet can tolerate. As a result, about 35% of Our Precious Biodiversity in terms of Flora, Fauna and Avifauna are already extinct; Agricultural Productivity has drastically gone down with a threat to Food Security of the Planet; Water Quality & Quantity has hugely Deteriorated; Sea Level Rise has gone up to an alarming level, frequent Disasters are widespread in our day to day life now, Many of the cold ocean currents are converted to Warm Ones, Air Pressure Belts have shifted Considerably, None of the Ecosystems of the Planet is Supplementing to each Other.

Environment, Water, Air, Trees, all the Elements of Nature silently tolerate all the torture that we humans impose on them. Water doesn't shout, "Don't abuse me", Air never raise Alarm, if Someone silently pollute it and a Tree never calls anyone, "Don't cut me!" and often gives the Shelter and soft Shadow to a Person, even who even axes it. In Such a Situation, Policing of Nature is really Complex and most difficult Operation and Probably next to impossible. Since the human interest, is always to benefit, Carbon Trading, has been Designed to Solve these Challenges, where the Polluter Pays; who reduces the Emission is paid for.

Considering this, because of the Demand of time, we at CMI-IISD's Carbon Management School, very well designed a two days intensive Certificate Course, which is, Highly Professional; titled "Carbon Management : GHG Accounting, Carbon Foot-printing, Markets & Trading". Please note the Course has a Cap of 50 Participants and admission is Confirmed on First Come, First Serve Basis.

The Objective of this Certificate Course is to Deliver the Complete Knowledge in a Comprehensive way, During this Program; so that each Participant emerges as an Expert in Carbon Management which enable them to design and Deliver Projects Consultancy and Credible Knowledge Documents in the field of: Scope 1, Scope 2 and Scope 3 Green House Gas Mapping, preparing Carbon Management Plan (CMP), Carbon Foot-printing, Net-Zero Certification process, Understanding the Dynamics of the Carbon Markets, how to generate Compliance as well as Voluntary Carbon Credits and trade them in National, International Commodity Markets *as well as* Carbon Exchanges; Doing Business while Caring for the Planet.
